Radio TechCheck

The Weekly NAB Newsletter for Radio Broadcast Engineers

Continuing Education for Radio Engineers

We know that most of you are extremely busy maintaining multiple facilities, covering station IT issues and trying to keep up with the latest technological advancements that may affect your company's business.

Now is the perfect time to put the 2011 NAB Show on your calendar. The Broadcast Engineering Conference takes place April 9 – 14 at the show in Las Vegas. The conference, along with the world's largest electronic media exposition, offers the best way for you to stay on top of radio and allied industry developments. Attending conference sessions at the NAB Show helps toward SBE recertification. Meeting with technical representatives of broadcast equipment manufacturers will get answers to your nagging problems. And of course, getting a chance to meet with your colleagues and business associates make the trip to Las Vegas even more worthwhile.

Especially for radio engineers and those in allied industries, the Broadcast Engineering Conference will feature presentations on the Future of Radio, Improving HD Radio, RDS Implementation and Emergency Operations.

A special all-day session chaired by Glynn Walden, Senior VP Engineering, CBS Radio will address a variety of topics important to radio broadcasters. The Radio Engineering Forum takes place on Tuesday, April 12.

Here is a listing of just a few papers that will be presented at the Radio Engineering Forum:

Quality Radio Engineering on a Tight Budget

Getting the Most Out of Your Tower

Full Duplex for Your RPU Adds IFB

Case Study: Building an AM Array on a Landfill

Automation Strategies for Sharing Resources and Talent

Moment Method Analysis for AM Antenna Arrays

Bend Radius for Coaxial Cables – How Much is Too Much

A special session – Implementing Regulatory Issues for Engineers – will cover EAS and what you need to know to maintain compliance with upcoming regulations.

Additional details on what we have in store for radio broadcasters at the NAB Show will soon be available on the show website: www.nabshow.com. Make your plans early to attend the show, continue your education and advance your career.

ADVERTISEMENTS

Nominate the Best!

NAB is currently accepting nominations for the 2011 NAB Engineering Achievement Awards. Established in 1959, the NAB Engineering Achievement Award is presented each

year to an individual for their outstanding accomplishments in the broadcast industry. In 1991, NAB began giving awards separately for achievements in radio and television. The award winners will be recognized at the Technology Luncheon at NAB 2011 on April 13 in Las Vegas, Nev.

Additional information and nomination form is available at <http://www.nab.org/events/awards/entryRules.asp?id=1991>. The deadline for nominations is January 21, 2011.
