Amateur Radio Operator's Reception

The Amateur Radio Operators Reception, affectionately known as the HAM Reception, will be held on Wednesday, April 9 at 6pm in Ballroom B of the Las Vegas Hilton. The Reception is free-of-charge and open to all attendees of the 2014 NAB Show.

The HAM reception is co-sponsored by [Heil Sound](#), [Broadcast Supply Worldwide](#), [Turner Engineering](#), and [DX Engineering](#). Each year, it brings together amateur radio operators from around the world to enjoy the fellowship of the HAM community, and for the chance to win fantastic prizes.

This year, our generous donors have contributed over \$14,000 in prizes, including an IC 7100 all-mode receiver donated by ICOM, a Yaesu VX-3GR from Cavell, Mertz & Associates, and a Z00 – H4N Zoom Stereo Handy Recorder from the Durst Organization. Every attendee is eligible to win a door prize, and will receive a raffle ticket upon entry.

HAM Reception Sponsors Bob and Sarah Heil at Last Year's Reception

Many of these prizes, their donors and links to their websites are listed below. We'd like to thank all of our donors for their generous contributions, and encourage anyone who would like to become a part of this tradition to contact Rich Johnson at rjohnson@nab.org

Hybrid Radio - Making it Happen at Your Station

Monday, April 7, 1:00 - 4:00 p.m., Room N238

Presented as part of the NAB Labs educational initiative, this special workshop will focus on how to implement hybrid radio at your station. Hybrid radio offers listeners new and exciting ways to enjoy and interact with a station's programming. With case studies and expert instructors, the workshop will explain the opportunities developing around hybrid radio. Demonstrations of hybrid radio in action will also be

presented, along with information about developing a budget for hybrid operations, including staff education, hardware/software requirements and technical support. For more details click [here](#).

NAB Broadcast Engineering Conference Proceedings 2014

Learn about the latest and hottest technologies used by broadcasters and electronic media around the world. This selection of more than 90 papers from the 68th annual conference features Ultra HDTV, advanced television technologies, digital radio advancements, audio over IP, hybrid television, next generation sports production, media asset management, video description and captioning, ancillary broadcast services, over-the-top technologies and services, and more.

Add it to your NAB Show registration or pick it up onsite at the two NAB Stores located in the Las Vegas Convention Center.
