

The Public and the COVID-19 Vaccine: Special Focus on Communities of Color

Mollyann Brodie, Ph.D.

Executive Vice President and Chief Operating Officer

Executive Director, Public Opinion and Survey Research

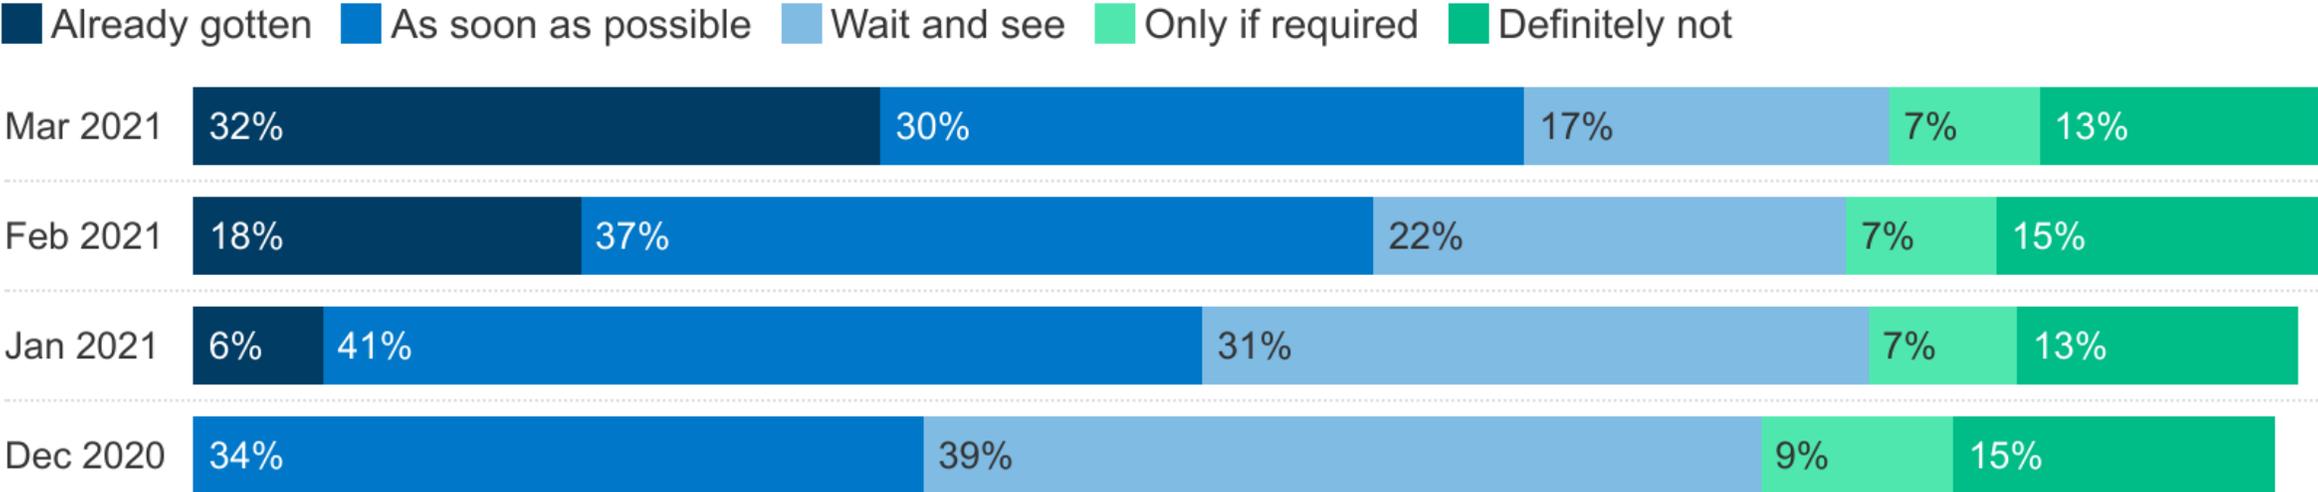

April 1, 2021

Filling the need for trusted information on national health issues.

One-Third Report Having Received At Least One COVID-19 Vaccine Dose; Share Wanting To "Wait And See" Continues To Shrink

Have you personally received at least one dose of the COVID-19 vaccine, or not? When an FDA authorized vaccine for COVID-19 is available to you for free, do you think you will...?

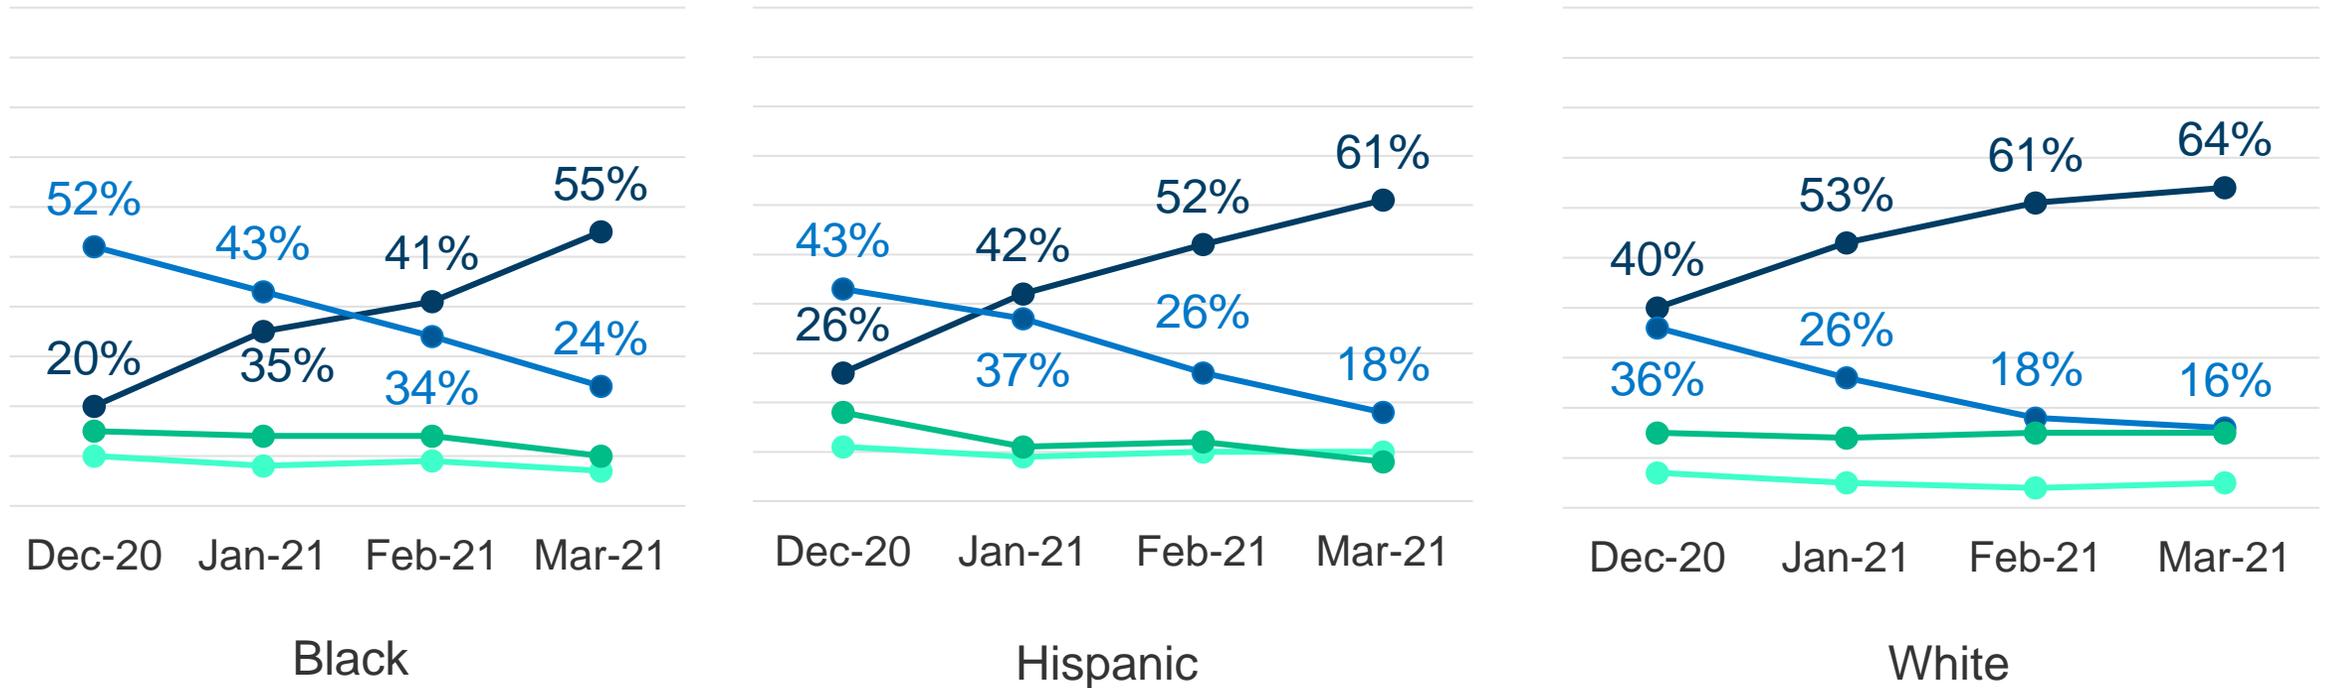

NOTE: December 2020 survey did not have an option for respondents to indicate they had already been vaccinated. See topline for full question wording.

SOURCE: KFF COVID-19 Vaccine Monitor (March 15-22, 2021). See topline for full question wording.

COVID-19 Vaccine Enthusiasm Continues To Increase Across Racial And Ethnic Groups

Percent who say they will get a COVID-19 vaccine:

● Already gotten/as soon as possible
 ● Wait and see
 ● Only if required
 ● Definitely not

No Group Monolithic in Vaccine Intentions

Have you personally received at least one dose of the COVID-19 vaccine, or not? When an FDA authorized vaccine for COVID-19 is available to you for free, do you think you will...?

■ Already received at least one dose
 ■ Will get vaccinated as soon as possible
 ■ Wait and see
 ■ Only if required
 ■ Definitely not

SOURCE: KFF COVID-19 Vaccine Monitor (March 15-22, 2021). See topline for full question wording.

What Helps to Move People to “Yes”?

- **Listen** and **validate** concerns
- Address concerns directly with **facts** and be **transparent** about **what’s not known**
- Use **trusted messengers**. Doctors, nurses and other health professionals among those most trusted.
- Show “**people like them**” who have been vaccinated and **tell their stories** about how they got **to a YES from a MAYBE** and/or a **NO**
- Help address **barriers** and **access** issues – show where to go, how to sign up, who can help
- Remember they are making a **personal choice** for themselves and their family – try to **support that** decision-making

What Are The Biggest Concerns?

- Worry about **side effects** from the vaccine
- Worry that side effects from **vaccine** could be **worse** than getting Covid-19 itself
- Might **get Covid-19** from the vaccine
- The **vaccine is too new** to understand long term effects
- **Process** of vaccine development was **too fast**
- The vaccine is **not as effective** as people say it is
- Might have to **miss work** to get vaccinated or due to side effects
- Won't be able to get vaccine from **a place they trust** or someplace **convenient**

What Information and Messages Work?

- The vaccines are **proving highly effective** at preventing hospitalization and death from COVID-19 in the **real world**
- Scientists have been working on the **technology** used in the new COVID-19 vaccines **for 20 years**
- More than 100,000 **people from diverse backgrounds** took part in the vaccine trials
- The vast **majority of doctors** who have been offered the vaccine have **taken it**
- There is **no cost** to get the vaccine
- Even though most people who die from Covid-19 are older or have other health conditions, **some young and healthy** people have also been **hospitalized and died** from Covid-19
- The main reason the Covid-19 vaccines were approved so quickly is because of **red tape** that is usually part of the development process **was removed and resources were allocated**, not because corners were cut
- **Risk of not taking vaccine** in the face of the known risks of Covid-19 itself are great
